3TG Minerals

Dear Sir or Madam,

Thank you for your letter regarding the requirements for the so-called 3TG minerals tin, tantalum, tungsten and gold, which result from the US Dodd Frank Wall Street Reform and the Conflict Material Act.

Tin is the only one of the metals listed to be included as an alloying ingredient in our products.

All our suppliers of concerned raw materials and semi-finished products confirmed that none of the 3TG metals originates from one of the listed conflict countries, such as the Democratic Republic of the Congo or the neighboring states.

This letter replaces all individual question catalogs on the topic.
We ask for your understanding.

Best regards,

Tridelta Siperm GmbH
