Dortmund, October 2020

REACH (EG) Nr. 1907/2006
Semi-finished and Finished Products Made of Metal

Ladies and Gentleman,

Tridelta Siperm GmbH is a manufacturer of semi-finished and finished products made of metal. According to REACH these objects receive a special shape, surface or design which determines function to a greater degree than does its chemical composition. In this case there are no direct obligations under the REACH Regulation. Metals in products must not be registered if they are not released under normal or reasonably foreseeable conditions of use, or be under mechanical prefabrication not chemical modified. This is the case with our products.

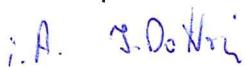

As a downstream user, it is our duty to identify the REACH compliance of our suppliers: All of our suppliers have registered the relevant substances. Availability of materials is thus guaranteed.

Also comparison with the ECHA list of substances of very high concern (SVHC), last updated on 06/25/2020, is performed by us regularly. Substances from the list are not included in our products. About modifications we will inform you automatically.

For further information do not hesitate to contact me.

Yours sincerely

Tridelta Siperm GmbH

i.A. Igor Dottai
