

Declaration on Conflict Minerals (3TG Minerals)

As part of the US Dodd Frank Wall Street Reform and the Conflict Material Act, requirements were placed on the origin of the so-called Conflict Minerals (3TG Minerals) such as tin, tantalum, tungsten and gold.

Tin is the only one of the metals listed to be included as an alloying ingredient in our products.

All our suppliers of concerned raw materials and semi-finished products confirmed that none of the 3TG metals originates from one of the following regions:

Angola, Republic of the Congo, Democratic Republic of the Congo, Rwanda, Tanzania, Uganda and Zambia as well as from the so-called CAHRA regions (cahraslist.net)

This letter replaces all individual question catalogs on the topic.
We ask for your understanding.

Dortmund, January 2026

A handwritten signature in blue ink, appearing to read 'I. Dottai'.
